Finger Saver

What?

This tool allows the worker to hold tools in place by a stick-and-loop snare type, keeping fingers away from potential impact, pinch or crush injuries. Use Finger Saver as a last line of defense, Finger Saver is easily replaceable if damaged, your fingers are not!

Where?

Use to hold tools or material in place where there is a potential impact, pinch or crush risk, such as flogging spanners and other hammer operations.

How?

Simply snare the item and hold firm from a safe distance.

Why?

To allow workers to hold items safe in place with hands at a safe distance from impact and potential injury.
