What?

Potassium based hold and ship cleaner for cleaning of holds and general deck cleaning, use with fresh or sea-water. Slightly foaming.

Where?

P-wash is water based and can be diluted with water to clean cargo holds, decks, structure etc. on ships, rigs, jetties, plants and similar.

How?

Mix 1 part T11 with 1p parts of water for general cleaning, adjust mix concentration up or down depending on cleaning requirements. Clean by mopping, spraying, brushing etc. After cleaning rinse off with water.

- 1) Hose off hold with seawater to remove worst contamination.
- 2) Hose off remaining contamination with a mix of T11 as described above.
- 3) Final washing with fresh water, ensure adequate drying before new cargo.

Why?

- Water based and safe
- Effective and economical
- Make holds grain-clean
- Easy to use
- Dilute on site.
