T30 Descaler SAFE powder

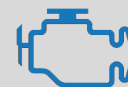

What?

A descaler powder used to remove scale and rust internally in water systems. Sulphamic acid based suitable for chlorinated systems.

Where?

T30 safe descaling powder is for descaling water systems that may be chlorinated and contains scale or rust that discolor, reduce flow or heat transfer. Piping, heaters, tanks, coolers, boilers etc.

How?

Mix T30 powder in water up to 24% (saturation) depending on level of scale and time allowed to contact. Normally start with 10% mix and adjust according to requirements. Lets soak, circulation improved effect and reduce required contact time. Drain mix and flush with potable water to neutralize pH.

Why?

- Safe for use in chlorinated water
- Improve heat exchange
- Improve flow
- Treat brown water problems

Product name	T30 Descaler safe powder
Product type	Acid descaler powder
PN	T30
Packaging:	25kg
Characteristics	Sulphamic acid base
