## T31 Marine growth remover

### What?

A liquid remover of marine growth such as barnacles, shells, etc from marine equipment.

### Where?

Use T31 to remove marine growth from marine equipment and structures such as strainers, hulls, jetties, buoys, wire or any other equipment fouled by MG after been in seawater

### How?

Soak item in T31 for best effect until MG is dissolved, change chemical if dissolving stops. Can also be used by spraying and brushing. Circulation will aid effect. Will cause etching on concrete. Use correct PPE. Hose off with fresh or seawater after job complete. Apply thin film of Trimar T10 after cleaning will stop flush rusting of steel (due to its corrosion inhibitor)

### Why?

- Remove MG when mechanical removal is not suitable
- Restore fouled equipment
- Improve flow and hydrodynamics
- Treat blockage
- Reduce drag and weight
