What ?

A Water based rust remover and metal brightener for de-rusting carbon steel and restore stainless steel.

When and where?

Remove corrosion on structure or process equipment where grit blasting is not suitable. Remove corrosion on small items by soaking. Clean ship sides etc from rust streaks. Clean and restore stainless steel surfaces.

How?

Apply degreaser by brush, spray, soak etc. Allow time for reaction based on corrosion severity. Wire brush if required and flush off with plenty potable water. Neutralise and protect surface with light spray of degreaser T10. Ensure ventilation and use proper PPE.

Why?

- Convenient hot work locations
- Not flammable
- Effective and economical
- Minimum preparations
- Easy to use
- Make your equipment look good again!
