What?

T36 cleans cement surfaces from contamination and removes cement stains and spills.

Where?

Clean fouled and dirty cement and concrete and sand wash surfaces such as parking, walk ways, laydown areas etc.

Clean tools and equipment fouled by cement stains and spills.

How?

Pour cement cleaner onto surface and distribute evenly with a squeegee or brush, let react and soak for a few minutes until satisfied, wash off with plenty of water. Can also be brushed or sprayed on and use for soaking depending on size of treatment area. Use correct PPE.

Why?

- Restore ugly and slippery concrete surfaces
- Restore decorative sand wash areas
- Use where HP washers are not suitable
- Clean fouled equipment
