What?

Sodium Hydroxide 50% in water for use in IMO 2020 closed loop exhaust gas scrubber.

Where?

Use in ships exhaust gas scrubbers as alkaline feed. Mix in COW or steam injection for cargo and fuel tank cleaning.

How?

Exhaust scrubber unit:

Add to the scrubbers alkali holding tank as described by the scrubber manufacturer.

Tank cleaning:

Use as degreaser agent for ships cargo tanks and fuel oil tanks, via COW, steam delivery systems or by HP washer. Dilution depends greatly on cargo characteristics and use with steam or cold water. Dilute as appropriate and according to ships cargo operations manual and MARPOL instructions.

* Do not use on aluminium, tin, zinc or galvanized surfaces.

Why?

- Allow scrubber to work
- Comply with IMO 2020
- Economical tank cleaning
