## T85 TrimarClear - Algaecide

### What?

Trimarclear is an algaecide used to treat algae blooms in waters such as swimming pools, ponds, and other water storage. Do not use in water bodies for aquatic life (harmful to fish etc). Contains Copper Sulphite

### Where?

Add to water bodies that have algae bloom and problems (water turn green or black)

### How?

For heavily fouled waters use about 5ppm T85 in water with pH 7-8. Lighter fouling use less concentration. Adjust dose as appropriate. If blooms returns add a smaller dose on regular basis. Circulate water for a full cycle followed by a static period where dead algae will sink to bottom. In swimming pools vacuum bottom bypassing filter to drain. Post treatment filtration will clarify water further, note to monitor filter, back wash as appropriate.

### Why?

- Keep swimming pools and fountains clear
- Avoid clogging of pond water (cooling, fire water and similar)

Product name	T85 TrimarClear
Product type	Water clarifier, algaecide
PN	T85
Packaging:	5, 25kg
Characteristics	Powder, Blue
